### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: no prior art has been presented or found that either teaches or fairly suggests the production of a polymer composition that may comprise (a) at least one cycloolefinic polymer comprising at least one cyclic olefin mer and at least one acyclic olefin mer, and (b) at least one non-halogenated elastomeric copolymer comprising at least one aromatic vinyl mer and at least one saturated alkene mer, said elastomeric copolymer having an aromatic vinyl content of from 20 to 35 weight percent based on the weight of the elastomeric copolymer, wherein said polymer composition exhibits a haze value of 10 % or less and a peak impact energy of 0.05 joules or greater, and wherein said cycloolefinic polymer and said elastomeric copolymer exhibit a difference in refractive index of at least 0.03, as claimed herein. The reference to Zen et al (US 2002/0128392) fails to show the elastomeric component as is now claimed. There is no suggestion to modify the reference to comprise the specific monomeric content of aromatic vinyl monomer, as recited herein. As such, the claims are deemed to define patentable subject matter. Since there are no other outstanding issues with regard to the clarity or enablement of the claims, these claims are deemed to contain allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
